

DIGIMATIC LOAD CELL

Load & Force Verification

The load cell is suitable for the calibration of compression testing machine. It consists of high quality steel block, named sensitive element, where strains have been fitted: the whole is housed in sheathing. While the load is applied, strains are transmitted to an amplifier which gives a load digital reading.

Technical Specifications :

Model Number	NL 4031 X / 009
Capacity	600 x 0.01 kN
Load Cell Dimension (mm)	Ø130 x 160 (H)
Working Temp.	0 - 45°C, Moisture ≤ 80% RH
Accuracy	Class ±1 %
Approx. Weight	11 kg
Power	Nicd AC Adaptor as charging source

Unit Consists of :

Model Number	Accessories Description	Qty
NL 4031 X / 009 - P001	Cell c/w Top Cap	1set.
NL 4031 X / LC	Handheld Digital Readabout	1unit.
NL 4031 X / 004 - P003	Power Charger Adapter	1no.
NL 4031 X / 004 - P004	Heavy Duty Carry Case	1no.
